Skill Set:

- Angular
- Node JS
- Java script
- HTML5
- CSS3
- Express JS
- GIT
- MongoDB
- MY SQL
- RXJS
- NGRX
- C# .NET WEB API

Education:

- Bachelor of Technology in Information Technology (**B.Tech IT**) Graduated from K.L.N.College of Engineering.

Professional Experience:

Organization	Position	Duration	
		From	To
Object Frontier software	Software Engineer	Jul -2017	Dec - 2019
Financial Software & systems Pvt. Ltd.	Software Engineer	Dec - 2019	Present

Key Responsibilities

- Understand and analyze client requirements
- Develop responsive user interface and single page application using Angular 2+ and CSS frameworks
- Design and implement Wireframes
- Develop front-end applications using AngularJS 2+, JavaScript, jQuery, HTML5 and CSS3
- Develop back-end application using .NET C# Web API, Node JS, SQL (Fire Bird DB, MYSQL)
- Consume web services using REST API
- Enhance application performance
- Resolve and implement UI change requests
- Prepare functional documents
- Perform unit testing and bug fixing

Project Work

App Composer (December 2019 - Present)

Domain : Banking

Team size : 4

Technology ORM and UI:

FRONTEND:

Angular 8, Typescript, HTML, SCSS, ngx-gridster, Angular material

BACKEND:

Node JS, Express JS, Swagger UI express, Mocha chai Unit testing

DB: MongoDB

Project Description: This is ongoing project, the main purpose of the application is to develop an Web application without having the developers to code for the creation of application, This is an R&D Project which involves the concepts such as Service mapper, Code generator, service Management and consumption, Message mapper etc., This application is under development for FSS Internal purpose to create and publish the project as per business requirements by any business Analyst or sales person with proper education of using the application.

Flavor Formula Editor (Jan 2019 – Dec 2019)

Domain : Food and Flavors

Team size : 10

Technology ORM and UI:

FRONTEND:

Angular 7, Typescript, HTML, SCSS, SYNCFUSION GRID, D3 Charts, Angular Material, Lod ash

BACKEND:

Node JS, Express JS, Sequalize(ORM)

DB: MySQL

Project Description: This is ongoing project, the main purpose of the application is to allow Scientists or Flavorists to create experiment from various sources. This application provides rich user Experience for end users. Flavorists can create formulae and sub formulae using this application. Formulae can be shared among them for review & grouped into folder. Formulae can be duplicated as many versions & user can open many editor.

Project Performance Report *MDC-PPR* (April 2018 – December 2018)

Domain : Construction

Team size : 7

Technology ORM and UI:

FRONTEND:

Angular 5, Typescript, HTML5, CSS3, Angular Material, SCSS, FLEXBOX, BOOTSTRAP

BACKEND:

C# .NET Web API, LINQ

DB: Microsoft SQL

Email: raj1996kamal@gmail.com
Phone: +91 7373441003
LinkedIn: https://www.linkedin.com/in/rajkamal-m-m-29bb86a4/

Project Description: The client is a leading construction giant in Philippines, to manage their completed as well as ongoing projects we have developed a system where they can track their each and every project performance and presenting report for the high level hierarchy. The application can handle different logins based on their roles and can access the system with assigned privileges. Each and every module in the system can be configured using admin module. This system can also be used as a product for who seeks a performance report with highly sophisticated features..

Invoice Management Software *Swinx-Scanlev* (April 2018 – December 2018)

Domain : Invoice management

Team size : 3

Technology ORM and UI:

FRONTEND:

Angular JS, HTML5, CSS3, BOOTSTRAP

BACKEND:

C# .NET Web API

DB: SQL (Firebird DB)

Project Description: This Application is for Invoice Management and Maintenance. The Project goal was to develop a customer's Invoice Management tool from Scratch to facilitate Customer Invoice Maintenance. This solution is having features with Excel Export and PDF Generation of the Invoices.
